

Give the most advanced cycling app a go.

Designed by Dutch World Tour-level cycling coaches, JOIN provides you with a completely flexible and adaptive cycling training plan. You only need to fill in your availability, goal and personal profile and JOIN builds a personal training program for you. You can select a goal from our extensive database of cycling events or you can create your own custom cycling goal that the training program will then work towards. The algorithm adapts the schedule to your training performance and helps you to keep improving. JOIN shows you how your fitness develops and is your virtual, 24/7 cycling training planner. JOIN works together with most other cycling platforms, like Garmin, Wahoo, Strava, Zwift and Trainingpeaks to export workouts and import your training data.
